

## Telecom Trailer

BrownstoneIT supplies full telecommunication connectivity (data, voice and video) to hard-to-reach places using satellite and the Internet.

BrownstoneIT supplies **instant telecommunication connectivity into any site**. Our Telecom Trailer gives full mobility to this concept.

BrownstoneIT's Telecom Trailer allows your staff to work with full productivity as soon as they arrive on site. Even if the site:

- Has no power or telecoms
- Is in a very remote place
- Is in a vehicle moving regularly from place to place.

The BrownstoneIT Telecom Trailer allows you to:

- Be up and running within minutes of deployment to site.
- Get full internet access for a network of PC's
- Support voice communications.

Security is assured through our Net Security Gateway giving:

- Firewall protection
- Anti-virus x 2
- Content filtering
- VPN Support

Our Telecom Trailer is fully independent of infrastructure and comes with its own power generator and wireless access point. It can be configured with free standby bandwidth, to supply recovery from communications disaster such as:

- Fire damage
- Severed cable
- Or failed microwave link

Offering our customers an **effective disaster recovery solution**.
